REV.07 (11-2022)

READ OPERATOR MANUAL CAREFULLY!

IMPORTANT: To ensure full warranty protection, please fill out & return your warranty card.

Please fill out at time of installation for future reference.

Model No. _____

Serial No. _____

Machine Options _____

Sales Rep. _____

Sales Rep. Phone No. _____

Customer ID Number _____

Installation Date _____

HOW TO ORDER PARTS

Only use ICE Cobotics Company supplied or equivalent parts. Parts and supplies may be ordered online, by phone, by fax or by mail.

1. Identify the machine model.
2. Identify the machine serial number from the data label.
3. Ensure the proper serial number is used from the parts list.
4. Identify the part number and quantity.
Do not order by page or reference numbers.
5. Provide your name, company name, customer ID number, billing and shipping address, phone number and purchase order number.

PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations.

Always remember to recycle.

ICE Cobotics (GuangDdong) Company Limited

XiangShi Road LiaoBu DongGuan GuangDong China

SAFETY PRECAUTIONS

This machine is intended for commercial use. It is designed exclusively to scrub hard floors in an indoor environment and is not constructed for any other use. Only use recommended accessories.

All operators shall read, understand and exercise the following safety precautions:

1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- If not in proper operating condition.
- In outdoors areas.

2. Before starting machine:

- Make sure all safety devices are in place and operate properly.

3. When using machine:

- Go slow on inclines and slippery surfaces.
- Follow all safety guidelines.
- Be very careful when using the machine in reverse.
- Reduce speed when turning.
- Report and fix any damage to machine prior to operating it.
- Never allow children to play on or around.
- Do not operate on inclines that exceed 5% (3°).

4. Before leaving or servicing machine:

- Stop on level surface.
- Turn off machine.

5. When servicing machine:

- Read operators manual thoroughly prior to operating or servicing this machine.
- Use manufacturer supplied or approved replacement parts.
- Secure machine with wheel blocks prior to jacking the machine up.
- Use approved jack or hoist to safely elevate the machine.
- Disconnect batteries prior to working on machine.
- Wear gloves when handling batteries or battery cables.

- Avoid any contact with battery acid
- Avoid moving parts. Do not wear loose fitting clothing while servicing machine.

 **WARNING: Batteries emit hydrogen gas. Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.**

 **WARNING: Flammable materials can cause an explosion or fire. Do not use flammable materials in tanks.**

 **WARNING: Flammable materials or reactive metals can cause explosion or fire. Do not pick up.**

MACHINE COMPONENTS

1. Control Handle
2. Brush pressure adjusting buttons & indicator light
 - + Brush pressure increase button
 - Brush pressure decrease button
3. Hour meter
4. Speed Control Knob
 -  Slow Speed
 -  Fast Speed
5. Battery Meter
6. Main Power Key Switch
7. 1-STEP scrub head up/down switch & indicator light
8. Solution flow Control Buttons & Indicator Light
 - + Solution flow Increase button
 - Solution flow Decrease button
9. Vacuum Motor Switch & Indicator Light
10. Emergency stop button
11. Drive motor circuit breaker
12. Solution Tank Level / Drain Hose
13. On-board battery charger
14. Caster, 2Inch, Squeegee Adjustment
15. Bumper Rollers
16. Squeegee Assembly
17. Ball Valve
18. Casters, 4 Inch
19. Squeegee Vacuum Hose
20. Filter Assembly
21. Wheels, 8 Inch
22. Recovery Tank Drain Hose
23. Hose fill-port
24. Squeegee Lift Lever
25. Control Handle Start Bail
 -  Direction Decal
26. Batteries
27. Recovery Tank Support Stand
28. Vacuum Motor, 24VDC
29. Cup Holder
30. Recovery Tank Cover
31. Recovery Tank
32. ICE Logo
33. Vacuum motor circuit breaker
34. Bucket Fill Port/ Clean-Out Port
35. Solution Tank
36. LED Light
37. Front cover
38. Brush & Pad release plunger
39. Scrub Head adjusting bolt
40. Scrub Head Skirt
41. Scrub Head Assembly
42. Parking Brake (Option)

MACHINE SET UP & INSTALLATION

UNCRATING MACHINE

Be sure and check packing carton for any damage. Immediately report any damage to carrier. Check the contents of package to ensure that the following items are included:

- Machine
- 4-6V Batteries
- Squeegee assembly
- 2-Pad Drivers
- 2-Brushes

INSTALLING BATTERIES

The batteries are already in the machine upon delivery; However you will need to connect the cables to the battery posts.

⚠ WARNING: Batteries emit hydrogen gas. Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.

Recommended Battery spec:
4-6V, 260AH@20HR deep cycle batteries.
Max. batteries dimensions :
265mm (L) X 190mm (W) X 280mm (H)

1. Turn the main power key switch off.
2. Open recovery tank to gain access to battery compartment.
3. Carefully place the batteries into the compartment as shown in figure below. Place the battery brace at the rear of the batteries.
DO NOT DROP BATTERIES INTO COMPARTMENT!
4. Connect battery cables to posts in numbered order as shown in drawing below.
RED to POSITIVE and BLACK to NEGATIVE.

MACHINE SET UP

PRE-OPERATION CHECKS

1. Sweep or dust mop the surface to be cleaned.
2. Check battery meter to make sure batteries are fully charged. (See BATTERY CHARGING)
3. Check that squeegee is properly installed.
4. Check that brushes / pads is properly installed.

INSTALLING BRUSHES OR PADS

1. Turn off the 1-STEP Scrub head up/down switch (see machine components, item #7) and Raise the Scrub head off the floor, then stop machine on the level surface, remove the key and ensure the machine is turned off.
2. If using the Pad Driver, first attach the appropriate pad to the pad driver surface.
3. Align the pad driver or brush under the motor hub and push it upward to engage.

4. To remove the pad driver or brush, raise the scrub head and push the pad release plunger (see machine components, item #38) downward.

MOUNTING THE SQUEEGEE ASSEMBLY

1. Lift the squeegee lift lever (see machine components, item #24) to the upward position.
2. Mount the squeegee assembly to the squeegee pivot bracket. make sure the knobs are completely seated into the slots before securing knobs.
3. Connect the vacuum hose to the squeegee assembly. Loop the hose by using the hose clip provided.
4. Check the squeegee blades for proper adjustment.

FILLING THE SOLUTION TANK

The machine is equipped with a hose fill-port (see machine components, item #23) at the rear of the machine, and a bucket fill-port (see machine components, item #34) located under the recovery tank. Before accessing the bucket fill-port make sure that the recovery tank is empty.

Fill the solution tank to the "100L" level on the solution tank sight gauge. When using the bucket fill-port, stop filling when the level reaches the bottom edge of the fill-port.

Conventional scrubbing - Fill solution tank with water (not to exceed 60°C/140°F. Pour a recommended cleaning detergent into the solution tank according to mixing instructions on the container)

NOTE: When filling the solution tank with a bucket, make sure that the bucket is clean. Do not use the same bucket for filling and draining the machine.

! WARNING: Do not put any flammable materials into solution tank. this can cause an explosion or a fire. Only use recommended cleaning chemicals. Contact your janitorial supply distributor for recommendations on proper chemicals.

MACHINE OPERATION

! WARNING: Do not operate machine unless you have read and understand this manual.

1. Turn the main power key switch(see machine components, item #6) to the on (I) position.
2. Check the battery level meter (see machine components, item #5), if the battery meter is in the red, **DO NOT** continue to operate the machine and recharge the batteries immediately.
3. Turn on the 1-STEP scrub head up/down switch (see machine components, #7) to lower the scrub head to the floor, the 1-STEP switch indicator is light.
4. Lower squeegee assembly to the floor by lowering the squeegee lift lever(see machine components, item #24).
5. Check the solution flow indicator (see machine components, item #8), adjust the solution flow control switch to a desired flow rate.

NOTE: Solution will not begin to flow until the control handle bail is pulled.

6. Turn on the vacuum motor switch(see machine components, item #9).
7. Pull the control handle bail (see machine components, item #25) backwards to start scrubbing .The machine will automatically propel forward. To reverse the machine, simply push the control handle bail forward.
NOTE: Raise squeegee when reversing machine.
8. The scrubbing speed can be adjusted, Adjust the speed control knob (see machine components, item #4) to a desired speed.
NOTE: 45-60 meters (150-200 ft)per minute is the recommended scrubbing speed.
9. simply press the pressure adjuting button to increase (+) or decrease (-) the brush pressure as needed.
10. To stop scrubbing, release the control handle bail, turn off the 1-STPE switch to raise the scrub head assembly, raise he squeegee assembly.

WHILE OPERATING MACHINE

! WARNING: Fire Or Explosion Hazard. Do Not Pick Up Flammable Materials Or Reactive Metals.

1. Go slow on inclines and slippery surfaces. Do not operate the machine on inclines that exceed 5% (3°).
2. Do not keep the machine in the same position with pad / brush spinning, keep the machine moving to prevent damage to floor finish.
3. If the squeegee assembly leaves streaks on the floor, raise the squeegee off the floor and wipe the blades down with a damp cloth. Pre-sweep the area to prevent leaving streaks on the floor.
4. Pour a recommended defoamer into the recovery tank if excessive foam appears.

! WARNING: Do not allow foam to enter the float shut-off screen, vacuum motor damage will result. Foam will not activate the float shut-off screen.

5. Occasionally check the battery level meter(see machine components, item #5). when meter is in the red, stop scrubbing and recharge the batteries.

! WARNING: When battery meter is in the red, do not continue to operate the machine. Battery damage may result.

6. When the solution tank runs empty, press the 1-STEP switch raise the brush head. Keep the squeegee down and continue to vacuum until all the dirty water is picked up.

NOTE: *Brush motors will not work when the scrub head assembly raised.*

NOTE: See **TANK DRAINING** section to learn how to drain recovery and solution tanks.

CIRCUIT BREAKER / FUSES

The machine is equipped with 2 resettable circuit breakers(see machine components, item #11, item# 33) to protect the drive motor and the vacuum motor from damage. If the circuit breakers should trip, it can't be reset immediately. You must first determine what caused the breaker to trip, and allow the motor to cool down and then you can manually reset the circuit breakers.

The machine is also equipped with a 60A fuse to protect the brush motors from damage. When replacing a fuse never substitute a higher Amps rated fuse than specified.

HOURLY METER

The hour meter (see machine components, item #3) records the number of total hours the brush motor has been powered on. Use the hour meter to determine when to perform recommended maintenance procedures and to record service history.

EMERGENCY STOP BUTTON/ BRAKE

The machine is equipped with an Electromagnetic Brake Mechanism on the Transaxle. When in case of Emergency, release the Control Handle bail(see machine components, item #25) or strike the Emergency stop button (see machine components, item #10), the machine will be braked and then stop. Reset the emergency stop button, turn on the Main power key switch, and then pull the control handle bail, the machine will be restart.

NOTE: *The machine can not be moved unless the Main Power Key Switch and the Control Handle bail be turned on.*

WARNING: Do Not Change the Default Settings of the Electromagnetic Brake Mechanism unless Authorized, otherwise it may cause Machine Damage or Personal Injury. Contact the Authorized Service center for machine repairs.

TANK DRAINING

1. Turn the machine off.
2. With the squeegee and scrub head in their "up" position, transport machine to approved area for draining tank(s).

DRAINING THE RECOVERY TANK

Any time scrubbing is completed, or when refilling solution tank, the recovery tank should be drained and cleaned.

! WARNING: If the recovery tank is not drained when the solution tank has been refilled, foam or water may enter the float shut-off screen and cause damage to the vacuum motor.

1. While holding the drain hose (see machine components, item #22) upward, remove the cap and lower hose to drain.
2. Open the recovery tank cover and rinse out the tank. Use a rag to remove any excess dirt.
3. Clean the float shut-off screen and debris tray located in the recovery tank .

DRAINING THE SOLUTION TANK

Any time scrubbing operation is completed, the solution tank should be drained and cleaned.

1. Pull the solution tank level hose(see machine components, item #12) off the hose fitting, this will allow the solution to flow freely into a bucket or floor drain.
2. Remove the cover of the filter assembly(see machine components, item #20) to drain the solution tank, check the filter screen and clean up it if necessary.
3. Rinse the solution tank with clean water after every use. This will help prevent chemical buildup and clogging of the solution lines.
4. After rinsing out the tank, securely reconnect the tank level hose to the hose fitting, replace the filter assembly cover and be sure the filter screen and the "O" ring is in the correct position.

BATTERY CHARGING

WARNING: Fire Or Explosion Hazard.

Batteries Emit Hydrogen Gas. Keep Sparks and Open Flame Away. Keep Battery Compartment Propped Open When Charging.

NOTE: Use only approved chargers with the following specifications:

- Automatic shut off circuit
- Deep cycle charging
- Output current of 20-30 Amps
- Output voltage of 24 volts

ON-BOARD BATTERY CHARGER

As standard configuration, the machine is equipped with the On-board battery charger (see machine components, item #13). The settings of On-board battery charger had been set for the recommended batteries type.

WARNING: The On-board battery charger setting's change are to be completed by authorized service centers only. Failure to properly set will result in the batteries or charger damage.

1. Transport the machine to a well ventilated area.
2. Turn the machine off.
3. If charging wet (lead acid) batteries check the fluid level before charging.
4. Prop up the recovery tank by the support stand (see machine components, item #27) for ventilation.
5. Connect the charger's AC power supply cord to a properly grounded receptable.
6. The charger will automatically begin to charge, once the charging cycle begins, the indicator lights will progress from red, yellow to green. when the green indicator light comes on, the charging cycle is done. Unplug the charger cord.

NOTE: The machine will can not operate when charging.

OFF-BOARD BATTERY CHARGER (OPTION)

1. Place charger and machine in a well ventilated area.
2. Turn the machine off.

3. If charging wet (lead acid) batteries check the fluid level before charging.
4. Prop up the recovery tank by the support stand (see machine components, item #27) for ventilation.
5. Connect the charger's AC power supply cord to a properly grounded receptable.
6. Connect the charger's DC cord into the machine's battery receptacle at the rear of the machine.
7. The charger will automatically begin to charge and will automatically shut off once the batteries are fully charged.
8. Upon completion of charging, disconnect the AC power supply cord first, and then disconnect the charger from the machine.

PREVENTATIVE MAINTENANCE

WARNING: Before performing any maintenance on the machine, be sure that the power is turned off, or the batteries are disconnected!

WARNING: Repairs are to be completed by Authorized service centers only. Any repairs completed by unauthorized persons will void the warrenty.

DAILY MAINTENANCE

1. Remove pad driver/ brush and clean with approved cleaner.
2. Drain recovery and solution tanks completely and rinse out with clean water. Visually check the recovery tank for debris and clean out as necessary.
3. Raise the squeegee assembly off floor and wipe it down with a damp towel. Be sure to store the squeegee in the up position.
4. Remove the float shut-off assembly and rinse it out with clean water.
5. Clean machine with an approved cleaner and a damp towel.
6. Recharge the batteries.
7. Check the condition of the squeegee blade wiping edge, rotate blade if worn.

MONTHLY MAINTENANCE

1. Clean the battery tops to prevent corrosion.
2. Check for loose battery cable connections.
3. Inspect and clean the recovery tank cover seal. Replace it if damaged.
4. Lubricate all grease points and pivot points with silicon spray and approved grease.
5. Check the machine for loose nuts and bolts.
6. Check the machine for leaks.

MOTOR MAINTENANCE

1. Contact your local Distributor for any motor maintenance.
2. Motor should have the brushes checked every 250 hours. Brushes should be replaced when they are worn to a length of 10 mm or less.

BATTERY MAINTENANCE

WARNING: Batteries emit hydrogen gas and an explosion or fire can result. Keep sparks and fire away from batteries at all times.

WARNING: Whenever servicing batteries, be sure to wear protective gloves. Avoid contact with battery acid at all times.

NOTE: For the best machine performance, keep batteries charged at all times. Do not let them sit in a discharged condition.

1. Always follow the battery charging directions as outlined in the BATTERY CHARGING section of this manual.
2. Keep battery tops and terminals free from corrosion. A strong solution of baking soda and water is the best way to keep the batteries corrosion free. **DO NOT ALLOW THE BAKING SODA / WATER SOLUTION TO ENTER THE BATTERY CELLS.**
3. Use a wire brush with the baking soda solution to properly clean the battery posts and connections.
4. Check battery connections for wear and loose terminals. replace if necessary.

MACHINE STORAGE

1. Always store the machine indoors.
2. Always store the machine in a dry area.
3. Always store the machine in its upright position.
4. Always store the machine with the pad driver/brush raised off the floor.
5. Always store the machine with the squeegee assembly raised off the floor.
6. If storing in an area which may reach freezing temperatures, be sure to drain all fluids from the machine prior to storage. Any damage caused by freezing temperatures will not be covered by the warranty.
7. Drain the recovery tank.
8. Drain the solution tank of all fluid.

CYLINDRICAL BRUSH MODEL

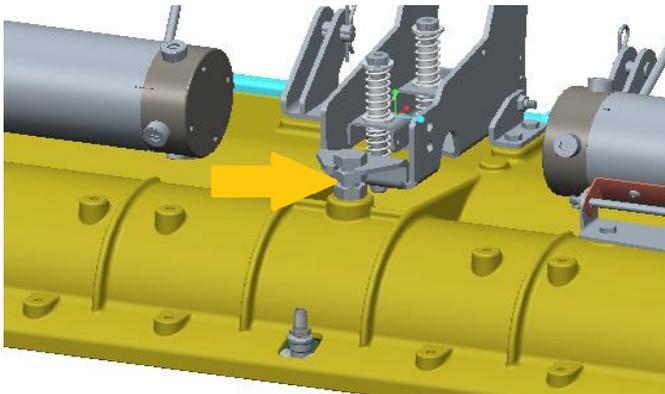

INSTALL BRUSH

1. Raise scrub head off the floor and turn off the power.(remove key)
2. Remove brush door from scrub head by loosening the knob.
3. Attach brush door to the brush end that has the double row of bristles to install brush.
4. Check the brushes to ensure they are properly adjusted.

INSPECT THE BRUSH PATTERN

After installing a new set of cylindrical brushes check the brush pattern to ensure proper brush adjustment.

1. Measure the distance from the front edge of the scrub head to the floor and from the back edge of the scrub head to the floor.The measurements should be the same.
2. To level the scrub head, loosen the lock nut and turn the leveling screw clockwise to lower the rear of the scrub head or counter--clockwise to lower the front.

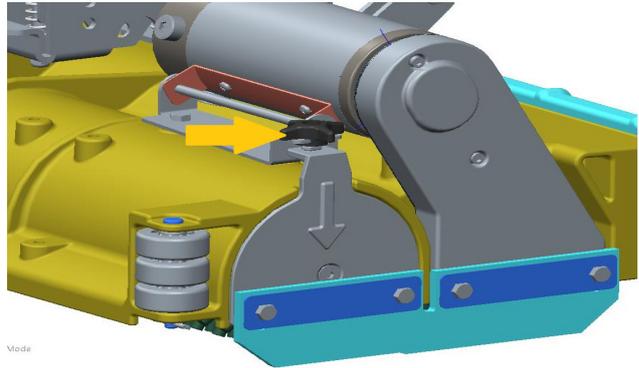

3. Position the machine on a dry dusty floor or apply a powdered substance, such as chalk.
4. Adjust the speed control knob to "zero" ()
5. Shut off the solution flow.
6. Pull the control handle bail to create a brush pattern on the floor.
7. Raise the scrub head and pull the machine away.
8. Observe the brush pattern on floor. If the brush pattern is uneven or tapered, adjustment is required.

Correct Brush Pattern

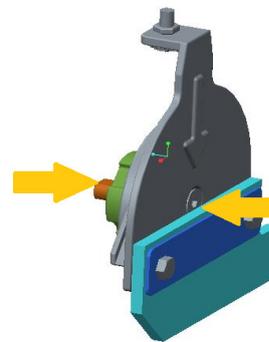

TO ADJUST A TAPPERED BRUSH PATTERN

1. Remove the brush door from the brush.

2. Hold the brush plug shaft with a wrench and loosen the 6mm hex screw.

3. To lower the brush end, turn the shaft clockwise for the front brush and counter--clockwise for the rear brush. Retighten hex screw.
4. Recheck brush pattern.
NOTE: Replace brushes when worn to 5/8" (15mm).

Cylindrical Assembly Instructions

Lower scrub head to the ground, then turn off the power (remove key).

STEP#1: Remove Front Cover

1. Remove knob (2) from solution tank.
2. Disconnect cable (1) of the led light.
3. Remove front cover from solution tank.

STEP#2: Remove Disc Scrub Head Assembly

1. Remove cotter pin and pins (5) from scrub head lift bracket, then remove cotter pin and pin (3) from spring bracket.
2. Remove lock nut and hex bolt (6) from roller guide (1).
3. Disconnect motor power cords (2).
4. Loosen clamp on the solenoid valve and remove tubing (4).
5. Remove scrub head assembly.

STEP#3: Assembly Cylindrical Scrub Head Group

1. Adjust initial position of sleeve nut(10) on the actuator(1) to right place(L) by rotating manually.
2. Place cylindrical scrub head under solution tank.
3. Connect tubing(3) and fasten clamp.
4. Insert pins into cylindrical scrub head lift bracket(4) through arm(9) installing on the frame, and place cotter pin into holes on the pin.
5. Insert pin into spring bracket(5) through sleeve nut installing on the actuator, and place cotter pin into holes on the pin(6).
6. Insert hex bolt into roller guide(8) through lifting bracket and fasten lock nut(2).
7. Connect motor power cords(7).

**STEP#4: Assembly Front Cover**

1. Connect cable of the led light(3).
2. Install front cover through stud fixing(1) on solution tank.
3. Fasten the knobs(2).

BASIC TROUBLESHOOTING

PROBLEM	CAUSE	SOLUTION
Machine will not operate	Control handle bail not pulled	Pull control handle bail
	Batteries need to be charged	Charge batteries
	Bad battery(s)	Replace battery(s)
	Loose battery cable	Tighten loose cable
	Emergency stop button activated	Reset Emergency stop button
	Main PCB fuse blown	Contact ICE service center
	Faulty key switch	Contact ICE service center
Brush motor will not operate	1-STEP scrub head up/down switch is off	Turn on the 1-STEP switch
	Battery meter lockout activated	Recharge batteries
	Brush motor fuse blown	Replace 60A fuse
	Brush motors over load	Turn on / off the 1-STEP switch
	Faulty control handle bail switch	Contact ICE service center
	Faulty brush motor or wiring	Contact ICE service center
	Worn Motor carbon brushes	Contact ICE service center
	Bad solenoid	Contact ICE service center
Machine does not propel	The Main Power Key Switch be Turned off, the Control handle bail not pulled	Turn on the Key switch, Pull the control handle bail
	Tripped drive motor circuit breaker	Reset drive motor circuit breaker button
	Faulty transaxle motor or wiring	Contact ICE service center
	Worn Motor carbon brushes	Contact ICE service center
Vacuum motor will not operate	Tripped vacuum motor circuit breaker	Reset vacuum circuit breaker button
	Faulty vacuum motor or wiring	Contact ICE service center
	Worn Motor carbon brushes	Contact ICE service center
Little or no solution flow	Ball valve set too low or shut off	Turn on the ball valve
	Solution flow control knob set too low or shut off	Adjust solution control flow knob
	Clogged solution tank filter or solution hose	Clean solution tank filter or flush out solution hose
	Clogged solution Solenoid valve	Remove valve and clean
Poor water pick up	Recovery tank is full	Drain recovery tank
	Loose drain hose cap	Tighten cap
	Clogged float shut-off screen located in recovery tank	clean screen
	Clogged squeegee assembly	Clean squeegee assembly
	Worn squeegee blades	Replace or rotate squeegee blades
	Incorrect squeegee blade deflection	Adjust squeegee blade height
	Loose vacuum hose connections	Secure hose connections
	Clogged vacuum hose	Remove clogged debris
	Damaged vacuum hose	Replace vacuum hose
	Recovery tank cover not in place	Properly position cover
	Damaged recovery tank cover seal	Replace seal
	Faulty vacuum motor	Contact ICE service center
Short run time	Low battery charge	Fully recharge batteries
	Defective batteries	Replace batteries
	Batteries need maintenance	See BATTERY MAINTENANCE
	Faulty battery charger	Repair or replace battery charger
	Down pressure lever is set for extra scrub head pressure	Lower down pressure lever

WIRING DIAGRAM

- BAT: 4-6V Batteries
- CHARGER: On board battery charger
- STOP SW: Emergency Stop switch
- BR1: Brake circuit breaker
- KEY SW: Main power Key switch
- HM: Hour meter
- ES1: Brush motor solenoid switch
- ES2: Solution solenoid valve switch
- PCB: Function electronic board
- LED1: Running lights
- BD: Driver motor circuit breaker

- RV: Speed potentiometer
- MB: Electromagnetic brake
- SW1: Control switch, forward
- SW2: Control switch, backward
- EB: Speed control board
- M1: Traction motor
- K: Relay
- M3: Scrub head lifting motor
- M2: Vacuum motor
- BR: Vacuum motor circuit breaker
- ML: Brush motor, left
- MR: Brush motor, right
