INTERNATIONAL CLEANING EQUIPMENT

## READ OPERATOR MANUAL CAREFULLY!

**IMPORTANT:** To ensure full warranty protection, please fill out & return your warranty card.

Please fill out at time of installation for future reference.

Model No. \_\_\_\_\_

Serial No. \_\_\_\_\_

Machine Options \_\_\_\_\_

Sales Rep. \_\_\_\_\_

Sales Rep. Phone No. \_\_\_\_\_

Customer ID Number \_\_\_\_\_

Installation Date \_\_\_\_\_

### HOW TO ORDER PARTS

Only use ICE Company supplied or equivalent parts. Parts and supplies may be ordered online, by phone, by fax or by mail.

1. Identify the machine model.
2. Identify the machine serial number from the data label.
3. Ensure the proper serial number is used from the parts list.
4. Identify the part number and quantity.  
Do not order by page or reference numbers.
5. Provide your name, company name, customer ID number, billing and shipping address, phone number and purchase order number.

#### PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations.

Always remember to recycle.

### International Cleaning Equipment

## SAFETY PRECAUTIONS

This machine is intended for commercial use. It is designed exclusively to scrub hard floors in an indoor environment and is not constructed for any other use. Only use recommended accessories.

**All operators shall read, understand and exercise the following safety precautions:**

### 1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- With brake disabled.
- If not in proper operating condition.

### 2. Before starting machine:

- Make sure all safety devices are in place and operate properly.
- Check brakes and steering for proper operation.

### 3. When using machine:

- Go slow on inclines and slippery surfaces.
- Follow all safety guidelines.
- Be very careful when using the machine in reverse.
- Reduce speed when turning.
- Report and fix any damage to machine prior to operating it.
- Never allow children to play on or around.

### 4. Before leaving or servicing machine:

- Stop on level surface.
- Turn off machine.

### 5. When servicing machine:

- Read operators manual thoroughly prior to operating or servicing this machine.
- Use manufacturer supplied or approved replacement parts.
- Secure machine with wheel blocks prior to jacking the machine up.
- Use approved jack or hoist to safely elevate the machine.
- Disconnect batteries prior to working on machine.
- Avoid moving parts. Do not wear loose fitting clothing while servicing machine.

 **WARNING:** Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.

 **WARNING:** Flammable materials can cause an explosion or fire. Do not use flammable materials in tanks.

 **WARNING:** Flammable materials or reactive metals can cause explosion or fire. Do not pick up.

## MACHINE COMPONENTS

1. Solution tank
2. Hose fill port & Cap
3. Squeegee assembly
4. Wheels, 10 inch
5. Scrub head assembly
6. Side squeegee assembly
7. Watching window, on-board battery charger
8. Brake pedal
9. Propel pedal
10. Front drive wheel

11. Operator seat
12. Steering wheel
13. LED light, work
14. Adjusting handle, seat
15. Off-board battery charger receptacle
16. Detergent level watching window
17. Warning light
18. Recovery tank cover
19. Recovery tank
20. Cup holder
21. Cap
22. Detergent bottle
23. Battery box

## MACHINE COMPONENTS

- 24. i-synergy™, ID card scanning area
- 25. Reset button
- 26. Emergency stop switch
- 27. Directional switch
- 28. Warning light switch
- 29. Contrast control button
- 30. Fault indicator
- 31. LED display screen
- 32. Multi-fault alternate button
- 33. Detergent dosage adjusting buttons & indicators
- 34. Vacuum motor switch & indicator
- 35. 1-Step switch & Indicator
- 36. Solution flow adjusting buttons & indicators
- 37. Horn button & Indicator
- 38. Brush pressure adjusting buttons & indicators
- 39. Drain hose, recovery tank
- 40. Drain hose, solution tank
- 41. Vacuum hose

## i-synergy™ INTRODUCTION

i-synergy™ collects operational data from cleaning machines and transmit the information to ICE's server. The ICE server generates daily reports and send them to designated end users by email. From these reports, end users will have information about machines' usage and even specific timings.

Besides, i-synergy™ also collects data on lithium-ion battery, vacuum motor, brush deck motor, transaxle, and other electrical components at least once every minute when the machine is in use and even during battery charging.

i-synergy™ will send notifications instantly to the ICE server in case of any malfunction. ICE maintenance personnel will receive a SMS within minutes from the ICE server for immediate servicing.

## MACHINE SET UP & INSTALLATION

### UNCRATING MACHINE

Be sure and check packing carton for any damage. Immediately report any damage to carrier. Check the contents of package to ensure that the following items are included:

- Machine
  - Lithium-ion Batteries
  - Squeegee assembly
  - 2-Pad drivers
  - 2-Brushes
1. Uncrate the wooden box, place the top board on the edge of pallet, lie in the front of the machine, as below shown.

**!** **WARNING: Do not operate machine unless you have read & understood this manual.**

2. Install batteries.(see *INSTALLING BATTERIES*)
3. Place the ID card on the scanning area (machine components, #24) to turn on the machine, make sure the Squeegee assembly (machine components, #3) and the Scrub head assembly (machine components, #5) is off the floor.

4. Sit in the Operator seat (machine components, #11), hold the Steering wheel (machine components, #12), press the Propel pedal (machine components, #9) and driving slowly the machine down from the slope.

### INSTALLING BATTERIES

The machine uses the Lithium-ion batteries, the batteries are already in the machine upon delivery; However you will need to connect the Lithium ion batteries to the machine.

**!** **WARNING: Fire or Explosion Hazard. Keep sparks and open flames away! Keep battery compartment open when charging.**

1. Turn off the machine.
2. Open and prop up the Operator seat, plug the batteries connector to the machine adaptor, connect machine i-synergy™ COM port to the batteries.

### MACHINE SET UP

#### INSTALLING BRUSHES OR PADS

1. Turn off the 1-Step switch (machine components, #35) and raise the Scrub head assembly off the floor, then stop machine on the level surface, ensure the machine is turned off.
2. If using the pad driver, first attach the appropriate pad to the pad driver surface.
3. Align the pad driver or brush under the motor hub and push it upward to engage.

4. To remove the pad driver or brush, raise the scrub head and remove the Side squeegee assembly (machine components, #6), push the edge of brush downward.

## MOUNTING THE SQUEEGEE ASSEMBLY

1. Turn off the 1-Step switch and raise the Squeegee assembly off the floor.
2. Mount the squeegee assembly to the squeegee pivot bracket. make sure the knobs are completely seated into the slots before securing knobs.
3. Connect the Vacuum hose (machine components, #41) to the squeegee assembly. Loop the hose by using the hose clip provided.
4. Check the squeegee blades for proper adjustment.

## FILLING THE SOLUTION TANK

The machine is equipped with a Hose fill-port (machine components, #2) at the side of the machine, and a bucket fill-port located under the recovery tank.

**NOTE: Before accessing the bucket fill-port make sure that the recovery tank is empty. When filling the solution tank with a bucket, make sure that the bucket is clean. Do not use the same bucket for filling and draining the machine.**

**WARNING: Do not put any flammable materials into solution tank. this can cause an explosion or a fire.**

## FILLING THE DETERGENT BOTTLE

The machine is equipped with a 6 liters Detergent bottle (machine components, #22). Open the Cap (machine components, #21) you can fill detergent, and watch the liquid level on the Detergent level watching window (machine components, #16).

The ratio of water and detergent is 0~5%, you can adjust this ratio via pressing the Detergent dosage adjusting buttons (machine components, #33).

**NOTE: Only use recommended cleaning chemicals. Contact your janitorial supply distributor for recommendations on proper chemicals.**

## **MACHINE OPERATION**

**WARNING: Do not operate machine unless you have read and understand this manual.**

### PRE-OPERATION CHECKS

1. Check the tank cover seals for damage.
2. Drain the recovery tank, check the vacuum fan inlet filter, clean them if necessary.
3. Check the vacuum hose for debris or blockage.
4. Check the squeegees for damage, wear and for deflection adjustment.
5. Check whether Pad/Brush is installed properly .
6. Check the brakes and steering for proper operation.

### OPERATION THE MACHINE

1. Sit in the Operator seat, adjusting the seat to comfortable place by pushing the Seat adjustment handle (machine components, #14).  
**NOTE: The machine will not travel unless the operator is sitting in the operator seat.**
2. Turn on the machine.  
Check the LED display screen (machine components, #31) , if there are fault codes and the Fault indicator (machine components, #30) is blink, please Do Not operation the machine unless the faults have been eliminated (please see *FAULT CODES AND ELIMINATE* section).
3. Select the preferred settings by pressing the Brush pressure adjusting buttons (machine components, #38) , Solution flow adjusting buttons (machine components, #36) and Detergent dosage adjusting buttons.  
**NOTE: Use the minimal pressure and flow as possible.**
4. Turn on the 1-Step switch, the Scrub head assembly and the Squeegee assembly will lower down automatically, all the presetting functions will turn on.
5. The machine can scrub in both forward and backward, place the Directional switch (machine components, #27) in the forward direction is to move forward, backward is to move backward. The horn will sound and the squeegee will raise automatically (the vacuum motor will turn off after a short delay) when drive machine backwards. This is to prevents damaging the squeegee.  
**NOTE: Go slow when drive machine backwards.**

6. Press the Propel pedal, the machine start scrubbing, the speed can be adjusted by controlling the force of foot stepping, light is slow, heavy is fast.

**NOTE: Go slow on inclines and slippery surfaces.**

7. To stop scrubbing, turn off the 1-Step switch, the scrub head will raise automatically, the squeegee will also raise after a short delay (the vacuum indicator flashing), please keep moving until the dirty water is picked up, and then release the propel pedal and stop scrubbing.
8. Turn off the machine.

### **BRAKE DEVICE**

The machine is driven by the Front drive wheel (machine components, #10), that is equipped with a brake device. When you release the Propel pedal, the machine will stop travel, the park brake will engage after a short delay.

The machine is equipped with a Brake pedal (machine components, #8), that can be used to control the machine if quicker stopping is needed or if operating on an incline.

### **EMERGENCY STOP BUTTON**

The machine is equipped with an Emergency stop button (machine components, #26), please push it if an emergency, that will shut off all power of machine and brake immediately.

To restart the machine, please reset the Emergency stop button, and turn off the machine and then restart.

**NOTE: Please hold the steering wheel when emergency stop.**

## **WHILE OPERATING MACHINE**

**WARNING: Fire Or Explosion Hazard. Do Not Pick Up Flammable Materials Or Reactive Metals.**

1. Go slow on inclines and slippery surfaces, go slow when turn and reverse. Do not operate the machine on inclines that exceed 7% (4°).
2. Drive machine in a straight path as possible, avoid turning the Steering wheel too sharply when machine is in motion. avoid sudden turns except emergencies.
3. Do not keep the machine in the same position with pad / brush spinning, keep the machine moving to prevent damage to floor finish.
4. If the squeegee assembly leaves streaks on the floor, raise the squeegee off the floor and wipe

the blades down with a damp cloth. Pre-sweep the area to prevent leaving streaks on the floor.

5. To obtain the optimum cleaning performance, you can adjust the brush pressure, solution flow and detergent dosage as your required. If poor picking up water performance is observed, please stop scrubbing and check the squeegee blade, adjust or replace if necessary.
6. If the dirty water path exceed the width of squeegee, please adjust the side squeegee assembly.
7. Pour a recommended defoamer into the recovery tank if excessive foam appears.

**WARNING: The foam do not activate water level switch, excessive foam may result in vacuum motor damage.**

8. Press the Horn button (machine components, #37) to alert if necessary.
9. The machine is equipped with a Warning light (machine components, #17), you can select turn ON or OFF by the Warning light switch (machine components, #28).
10. If there is a fault code F11 (Bat. very low) on the LED display screen, the machine will stop scrubbing and alarm, please drive the machine to charging.
11. If there is a fault code F8 (RecTank Full) on the LED display screen, the vacuum motor will stop working and alarm, please drive the machine to drain water.  
If there is a fault code F9 (SolTank Empty) on the LED display screen, the Detergent system will stop working and alarm, please fill the solution tank.
12. If there are other fault codes on the LED display screen, please turn off the machine, eliminate the fault (please see FAULT CODES AND ELIMINATE section), then restart machine.
13. For heavily soiled areas, please use DOUBLE SCRUBBING mode.  
The first time: Turn on the 1-Step switch, then press the Vacuum motor switch (machine components, #34), its indicator will turn off and the squeegee will raise automatically, then start to scrubbing this areas without picking up water.  
The second time: turn on the Vacuum motor switch, the squeegee will lower down automatically, and then start to scrubbing and picking up water.
14. If you only want to pick up water needn't scrubbing, Turn on the Vacuum motor switch (squeegee will lower down) and turn off the 1-Step switch (if it is ON), the scrub head will raise and then start to working.

## TANK DRAINING

### DRAINING THE RECOVERY TANK

Any time scrubbing is completed, or when refilling solution tank, the recovery tank should be drained and cleaned.

 **WARNING:** If the recovery tank is not drained when the solution tank has been refilled, foam or water may enter the float shut-off screen and cause damage to the vacuum motor.

1. While holding the Recovery tank drain hose (machine components, #39) upward, remove the cap and lower hose to drain.
2. Open the Recovery tank cover (machine components, #18) and rinse out the tank. Use a rag to remove any excess dirt. Clean the vacuum fan inlet filter located in the recovery tank .

### DRAINING THE SOLUTION TANK

Any time scrubbing operation is completed, the solution tank should be drained and cleaned.

1. While holding the Solution tank drain hose (machine components, #40) upward, remove the cap and lower hose to drain.
2. Rinse the solution tank with clean water after every use. This will help prevent chemical buildup and clogging of the solution lines.

## BATTERY CHARGING

 **WARNING:** Fire Or Explosion Hazard. Keep Sparks and Open Flame Away. Keep Battery Compartment Propped Open When Charging.

Use only ICE supplied or approved batteries charger, use unapproved charger may cause damage to the batteries and machine.

*Batteries charger specifications:*

- Applicable to charging Lithium-ion batteries
- Automatic shut off circuit
- Output current of 30 Amps
- Output voltage of 24 volts

1. Transport the machine to a well ventilated area.
2. Turn the machine off.
3. Prop up the Operator seat by the support stand for ventilation.
4. Connect the charger's AC power supply cord to a properly grounded receptacle.
5. The charger will automatically begin to charge, you can watching the charging status on the window (machine components, #7), once the charging cycle begins, the indicator lights will progress from red, yellow to green. when the green indicator light comes on, the charging cycle is done. Unplug the charger cord.

**NOTE:** *The machine will can not operate when charging.*

## **PREVENTATIVE MAINTENANCE**

**WARNING: Before performing any maintenance on the machine, be sure that the power is turned off, or the batteries are disconnected!**

**WARNING: Repairs are to be completed by Authorized service centers only. Any repairs completed by unauthorized persons will void the warranty.**

### **DAILY MAINTENANCE**

1. Remove pad driver/ brush and clean with approved cleaner.
2. Drain recovery and solution tanks completely and rinse out with clean water. Visually check the recovery tank for debris and clean out as necessary.
3. Raise the squeegee assembly off floor and wipe it down with a damp towel. Be sure to store the squeegee in the up position.
4. Remove the vacuum fan inlet filter and rinse it out with clean water.
5. Clean machine with an approved cleaner and a damp towel.
6. Recharge the batteries.
7. Check the condition of the squeegee blade wiping edge, rotate blade if worn.

### **MONTHLY MAINTENANCE**

1. Clean the battery tops to prevent corrosion.
2. Check for loose battery cable connections.
3. Inspect and clean the recovery tank cover seal. Replace it if damaged.
4. Lubricate all grease points and pivot points with silicon spray and approved grease.
5. Check the machine for loose nuts and bolts.
6. Check the machine for leaks.

### **MACHINE STORAGE**

1. Always store the machine indoors.
2. Always store the machine in a dry area.
3. Always store the machine in its upright position.
4. Always store the machine with the pad driver/ brush raised off the floor.
5. Always store the machine with the squeegee assembly raised off the floor.
6. If storing in an area which may reach freezing temperatures, be sure to drain all fluids from the machine prior to storage. Any damage caused by freezing temperatures will not be covered by the warranty.
7. Drain the recovery tank.
8. Drain the solution tank of all fluid.

### **FAULT CODE AND ELIMINATE**

This machine is equipped with a LED display screen and a red Fault indicator, you can control contrast ratio by Contrast control button (machine components, #29).

The LED screen will display the machine operating hours and the battery level status.

When a fault occurring, there will be fault code and warning message display on the LED screen, and the red indicator will blink continuously accompany an audible alarm.

If there is more than one fault, each fault code can be alternately display by pressing the Alternate button (machine components, #32).

Once fault occurring, please DO NOT continue operate the machine unless the fault are eliminated.

If the faults solved, press the Reset button (machine components, #25) to eliminate the fault code.

If the fault is occurred frequently, or the fault can't be eliminated, please contact ICE service.

Refer to the table below to determine the cause and remedy for the fault.

Fault code	Warning message	Fault cause	Remedy
F1	Sit in Seat	Not sit in the seat	Sit in the operator seat
		Seat circuit open	Check circuit or contact ICE service center
F2	Ems active	Emergency stop button be activated	Reset emergency stop button, restart the machine
		circuit open	Check circuit or contact ICE service center
F3	Sqge Stall	Squeegee lifting motor is overload	Restart the machine
		Squeegee lifting components fault	Check squeegee lifting components or contact ICE service center
F4	Act. OverLoad	Scrub head lifting motor is overload	Restart the machine
		Scrub head lifting components fault	Check scrub head lifting components or contact ICE service center
F5	Vac. OverLoad	Vacuum motor overload	1. Turn off the machine, wait a moment, restart machine. 2. If the fault is still exist,contact ICE service center.
F6	Bru. OverLoad	Brush motor overload	
F7	Propel Error	Propel motor overload	
F8	RecTank Full	Recovery tank is full	Drain the recovery tank
		Bad recovery tank water level switch	Replace or contact ICE service center
F9	SolTank Empty	Solution tank is empty	Fill the solution tank
		Bad solution tank water level switch	Replace or contact ICE service center
F10	Bat. Low	Battery is low, below 40%	Charging battery
F11	Bat. Very Low	Battery is low, below 20%	Charging battery
		Bad batteries	Replace batteries
F12	Brake Open	Brake circuit open	Contact ICE service center
F13	Accel. SRO	stepping the propel pedal when starting machine	Release the propel pedal when turn on the machine
F14	Brake Short	Brake device overload	Restart machine
		Bad brake device	Contact ICE service center
F15	No Brush	No brush or brush installed improperly	Install brush properly

## TECHNICAL SPECIFICATIONS

MODEL	RS26L	RS32L
DIMENSIONS L × W × H	1565 × 815 × 1440 mm	1565 × 950 × 1440 mm
WEIGHT	280 Kg	290 Kg
WEIGHT WITH BATTERIES	400 Kg	410 Kg
RECOVERY TANK CAPACITY	110 L /29 Gal	
SOLUTION TANK CAPACITY	110 L /29 Gal	
SQUEEGEE WIDTH	860 mm / 33.8 in	1030 mm /40 in
CLEANING PATH WIDTH	650 mm /26 in	800 mm /32 in
PRODUCTIVITY RATE (IN THEORY)	4300 m <sup>2</sup> h	5200 m <sup>2</sup> h
TRAVEL SPEED (TRANSPORT)	6.5 Km/h	
MINIMUM AISLE TURN	1800mm	1900mm
PAD/BRUSH PRESSURE	35Kg / 55Kg / 75Kg	
SOLUTION FLOW	0 ~ 2.7 L/ Min	
DRIVE WHEEL	800W	
BRUSH MOTOR	450W × 2	
VACUUM MOTOR	450W	
BATTERIES	Lithium-ion batteries, 240AH	
RUN TIME PER CHARGE	3~3.5 Hours	
VOLTAGE DC	24V	
DECIBEL RATING AT OPERATOR'S EAR, INDOORS	68 dB(A)	
GRADE LEVEL, MAX	Scrubbing: 4°/7%	Transporting (empty):10°/17.5%
